

Tangled FX

Brand new photo effect for your iPhone and iPad

Tired of all the same old photo effects? Want something new and fresh?

Be the first to use the brand new Tangled effect and surprise your friends. Create art from images with just a touch of a button.

Watch the magic unfold in an animated photo process. You would never expect that your photos had such beauty hidden in them. All those tangled strokes, strings and swirls just pop out. And all of this in full HD 8 mega pixel photo resolution.

- ✓ **Brand New Effect**
New original photo effect with astonishing results
- ✓ **Full Resolution**
Rendering at full photo resolution of 8 mega pixel and more, with preview mode so you can quickly see the effects
- ✓ **Small photos automatically upscaled**
Tangled FX can handle even small photos. For this they are upscaled before rendering which gives more details, quality and higher resolution.

✓ **16 Different Presets**

And two sample images showing the effect possibilities to get you started

✓ **Fine Tune**

Tune the final effect to your liking or switch to advanced settings to have full control

✓ **Custom Presets**

Save your custom preset and share it in a clickable link form

✓ **Highly Optimized**

Tangled FX takes full advantage of your device GPU pushing it to the max

✓ **Easy Sharing**

Share to Instagram, Twitter, Facebook, Mail, Camera roll, Clipboard or any other photo app

✓ **Community Tab**

Quickly find and join the tangling community and share your creations

✓ **Universal App**

So you can enjoy it on your iPhone, iPod Touch and iPad

.. and an inside manual just in case :)

(For iPhone 4 max photo resolution limited from 2592x1936 to 2048x1536 pixels because of hardware restrictions. All other devices handle the full photo resolution of the camera and even more.)
